

LAINOX[®]
IDEAS EN ACERO

Who are we?

We are a family business with experience in the field since 2018, where day by day we have been improving to be the partner, support and contribution that all our friends and BeeKeepFriends need.

We are not just a company that manufactures beekeeping machinery, we are a family full of dreams, which have already been fulfilled and to be fulfilled.

It is because of that...

WE DO NOT MAKE BEEKEEPING MACHINERY, WE MAKE YOUR DREAMS COME TRUE.

We are motivated by the idea of making your dreams come true and generating products that help our clients to work correctly and cleanly.

And because we make your dreams come true, we work on all kinds of projects in stainless steel. The one you have in mind; we can do it.

In a nutshell we are: LAINOX... IDEAS EN ACERO.

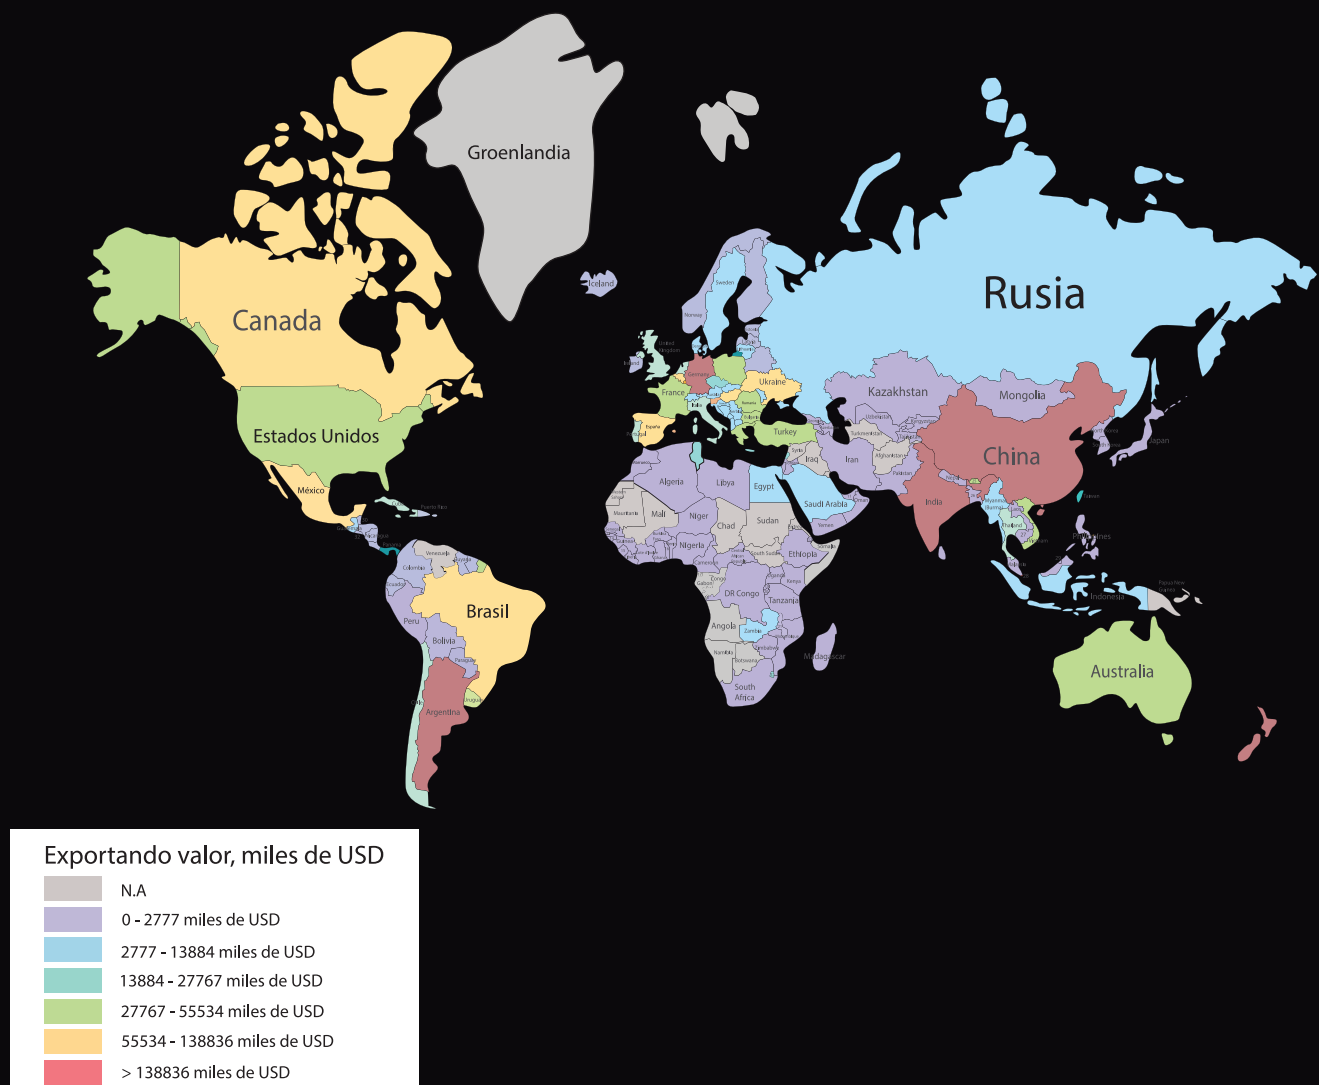

LAINOX[®]
IDEAS EN ACERO

World Scene Of Honey Exportation

As a company, we want to strengthen de industry and national production of honey.

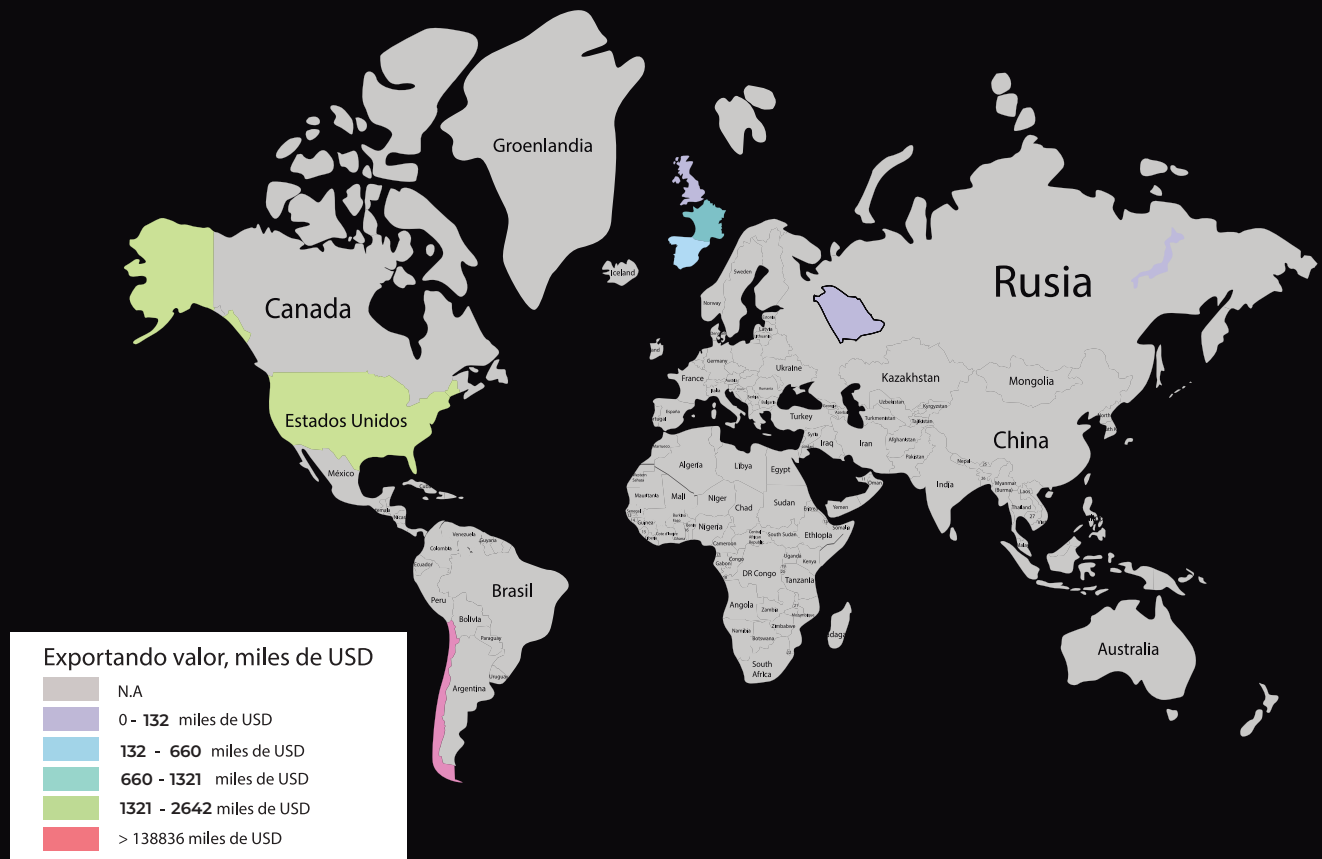

Currently Chile is a country with low levels of exportation of honey, despite the great potencial it has for the production of it.

National Export Reality

569

As a result of this growing of the national industry, we expect an increment of the destination to export the chilean honey. Achieve the global positioning that it deserve.

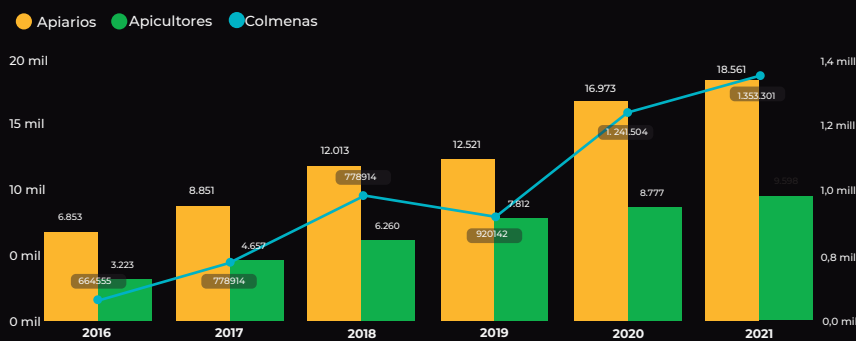

Growing the Beekeeping

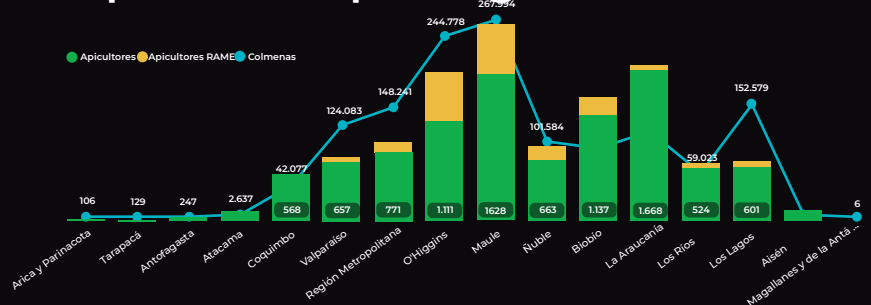

Until 2021, there has been a constant and gradual increase in the number of Beekeepers and Beehives in the country, concentrating the production for export of this super food in the central-southern part of the country.

Apicultores, apiarios y colmenas por año

Therefore, we see it necessary to accompany the Beekeeper in his production process by offering a variety of products that facilitate the harvesting tasks for honey, without the need to import this equipment from other countries, thus minimizing the cost of the equipment for the Beekeeper.

Apicultores por región 2021

PRO DUCC TTS

All our products are designed to help the beekeeper of small and medium production, accompanying their industrial growth. Each piece of equipment designed by the LAINOX team is manufactured in AISI 304 stainless steel, a steel quality that allows food treatment, in addition the equipment is designed with electrical and electronic elements that allow the automation of its processes, thus providing efficiency in the harvest for the beekeeper.

As a company we are constantly designing new equipment to update our catalog and offer a large number of options for the different requirements of beekeepers.

Radial Honey Extractor w/Electric Drive

9/12/20/30/40/50/60 Cassettes
(Frames) Capacity.

- Three Phase Electric Motor.
- Single Phase Frequency Inverter.
- Revolution Structure: AISI 304.
- Body and Tops: AISI 304.
- Support Structure: SAE 1045.

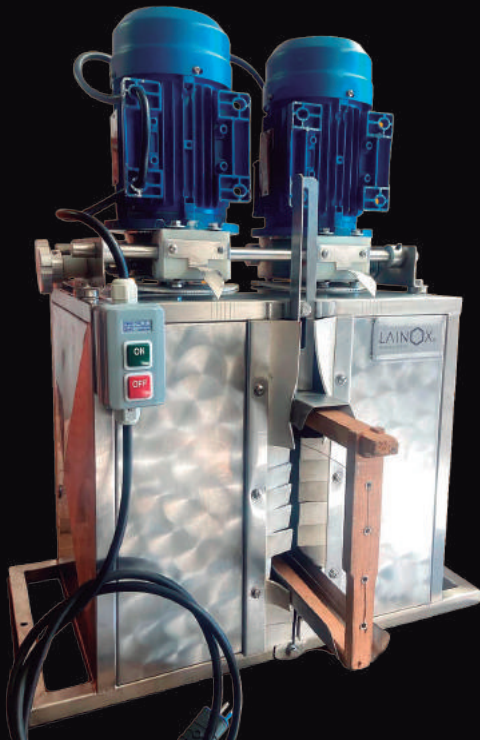

Steam Wax Melter

- 24 / 48 Cassettes (Frames) Capacity.
- Tray and Inside Pipe: AISI 304.
- Strainer: AISI 304.
- Support Structure: SAE 1045.
- Steam Generator Boiler Integrated.
- Stove and Hoses Included.
- Integrated Thermometer for Temperature Control.

LAINOX®
IDEAS EN ACERO

Uncapping Roller Machine

- 2 Single Phase Electric Motors
- Movement Rails for Motors.
- Adjustable Supports for Inlet and Outlet of Frames.
- Body Structure: AISI 304.
- Gastronomic Polypropylene Rollers.

LAINOX®
IDEAS EN ACERO

Operculum (Solid Wax) Caster w/ C.C. Boiler

- 40 / 60 Cassettes (Frames) Capacity.
- Revolution Structure: AISI 304.
- Body and Tops: AISI 304.
- Strainer Baskets: AISI 304.
- Support Structure: SAE 1045.
- Boiler (Steam Generator): Galvanized SAE 1045.
- Water Level Viewer, Thermometer and Pressure Gauge included in the boiler.
- Stove and Hoses included.
- Three Phase Electric Motor.
- Single Phase Frequency Inverter

Uncapping Knife for Tray Vessel

- Knife Mechanism: AISI 304.
- Heat System: Electric Resistance in the Knife.
 - Removable structure for complete cleaning.

Fundidor De Opérculo Con Caldera C.C.

- 100 / 130 Liters of Capacity.
- Internal Construction: AISI 304.
- Support Structure: AISI 304.
- Integrated Recirculation Pump.
- Drains: Separated for Honey, Wax and Opérculum Residues.

Tray Vessel for Filter and Uncapping

- Tray Length: 1 / 1,5 / 2 / 3 meters.
- Tray Body: AISI 304.
 - Strainer: AISI 304.
 - Drain: 2" Flap Valve.
 - Support Structure: SAE 1045.t

Steam Wax Melter Water Bath

24 Cassettes (Frames)
Capacity.

- Inside Tray: AISI 304.
- Strainer: AISI 304.
- Tray and Cover: AISI 304.
- Support Structure: SAE 1045.
- Intergrated Thermometer for
Temperature Control

Vertical Ripener

- Body Construction: AISI 304.
- Strainer: AISI 304.
- Upper Cover: AISI 304.
- Drains: Flap Valve.
- Capacity: 100 to 600 [kg].

Radial Honey Extractor Raffle Box Style

- 100 Cassettes (Frames) Capacity.
- Revolution Structure: AISI 304.
- Body and Top: AISI 304.
- Baskets: AISI 304.
- Support Structure: AISI 304.
- Three Phase Electric Motor.
- Single Phase Frequency Inverter.
- Operation Cycle: Manual / PLC.

Honey Pump

- Flow: 30 lts/min.
- Pump Body: Gastronomic polypropylene.
- In and Out Connections: AISI 304.
- Connections Diameter: 2 inches.
- Mobile Support Structure: AISI 304.
- Single Phase Electric Motor.
- Manual Operation Cycle.

Manual Press for Operculum

- 30 Liters of Capacity.
- Press Mechanism: AISI 304.
- Strainer: AISI 304.
- Collection Tray: AISI 304.
- Support Structure: SAE 1045.
- Removable structure for complete cleaning.

LAINOX®
